myReitzFan
Smart Solutions by Reitz

The design of industrial fans can be complex and time-consuming, especially in the early stages of a project. Efficient decisions require precise data and clear guidance.

With **myReitzFan**, you can configure your industrial fans yourself - quickly, in accordance with standards, and specific to your project. The software uses the same technical logic as our experts, enabling you to make informed decisions based on reliable data.

The result: reliable dimensioning and a clear basis for decision-making for your project.

Your added value

+ Design based directly on manufacturer data
+ Significantly reduced planning & quotation times
+ Immediate access to dimension sheets & documentation
+ Transparent basis for decision-makingg

Design tools

myReitzFan provides you with two powerful design tools – from quick start-up to detailed project planning. You can choose exactly the solution that efficiently supports you in selecting fans and gives you confidence in your decision-making.
